

## Community Bank Leverage Ratio and the MPF<sup>®</sup> Program

*March 9, 2020*

The Community Bank Leverage Ratio (“CBLR”) final rule was recently adopted by the federal banking agencies and became effective on January 1, 2020. The rule is optional and designed to simplify the calculation of regulatory capital. It allows community banks to calculate a leverage ratio based on total assets. *Qualifying banks* would thus no longer have to calculate risk-weighted assets.

### **QUALIFYING COMMUNITY BANKING ORGANIZATION**

A qualifying community banking organization is defined as a depository institution or depository institution holding company that is not an advanced approaches banking organization and that meets the following criteria:

- CBLR greater than 9 percent;
- Total consolidated assets of less than \$10 billion;
- Total off-balance sheet exposures (excluding derivatives other than credit derivatives and unconditionally cancelable commitments) of 25 percent or less of total consolidated assets; and
- Total trading assets and trading liabilities of 5 percent or less of total consolidated assets.

### **CALCULATION OF THE CBLR**

The CBLR is calculated as the ratio of Tier 1 Equity to average total consolidated assets. The Federal Banking Agencies estimate that as of March 31, 2019, there were 5,221 insured depository institutions with less than \$10 billion in total assets and that 85% would qualify to use the CBLR. FHLBank Topeka estimates 85% of banks in its region would also qualify to use the CBLR.

We further note that the three-year phase-in of the potential adverse impacts from CECL on regulatory capital remain in effect under the CBLR framework.

### **OFF-BALANCE SHEET EXPOSURES**

While most of the qualifying criteria are relatively straightforward, off-balance sheet exposures require further explanation. Under the proposal, total off-balance sheet exposures would be calculated as the sum of the notional amounts of certain off-balance sheet items as of the end of the most recent calendar quarter. Total off-balance sheet exposures would include:

- The unused portions of commitments (except for unconditionally cancellable commitments);
- Self-liquidating, trade-related contingent items that arise from the movement of goods;
- Transaction-related contingent items including performance bonds, bid bonds, warranties and performance standby letters of credit;

- Sold credit protection through
  1. Guaranties
  2. Credit derivatives
  3. Credit enhancing representations and warranties
- Securities lent and borrowed, calculated in accordance with reporting instructions to the Call Report;
- Financial Standby Letters of credit;
- Forward agreements that are not derivative contracts; and
- Off-balance sheet securitization exposures.

Total off-balance sheet exposures would not include derivatives (such as foreign exchange swaps and interest rate swaps) but would include credit derivatives.

The off-balance sheet exposure limitation has a direct effect on FHLB MPF® participating financial institutions. PFIs opting into the CBLR would no longer have to calculate the risk-weighted assets arising from the CE Obligation amount in accordance with BASEL III. It simply reports the total net CE Obligation amount under Tier I leverage ratio calculation as an off-balance sheet securitization exposure. The total net CE Obligation amount, combined with other off-balance sheet exposures, cannot exceed 25 percent of total assets.

The table shows a simplified example assuming the PFI has \$7,000 of net CE Obligations and no other off-balance sheet exposures.

## MPF Member

### Current Tier 1 Leverage Ratio

9.38%

### Qualifying Criteria for Using the CBLR Framework:

Total Consolidated Assets < \$10 billion		\$ 450,000
Trading Assets and Trading Liabilities as a % of Total Consolidated Assets (5% limit)	0.00%	-
Off-Balance Sheet Exposures:		
Unused Portion of Conditionally Cancellable Commitments	\$ -	
Securities Lent or Borrowed	-	
Other Off-Balance Sheet Exposures	\$ 7,000	
Total Off-Balance Sheet Exposures as % of Total Consolidated Assets (25% limit)	1.56%	\$ 7,000

### CBLR LESS THAN 9%

What happens if a community bank elects the CBLR and then falls below it, because of growth in total assets and/or declines in Tier One equity. If a community bank falls below the 9% CBLR threshold, it could revert to use of the existing rules. If a community bank elects to remain in the CBLR framework, the rule provides a two-quarter grace period to restore the ratio. Nevertheless, to remain in the CBLR

framework during the grace period, a community bank would have to meet the requirements to be well-capitalized under the existing rules.

### **BEFORE ADOPTING THE RULE**

At 9 percent, the CBLR capital threshold is well in excess of the 5 percent considered to be well-capitalized under the risk-based capital rules. Wilary Winn therefore strongly encourage PFIs to evaluate how adopting the CBLR framework would affect the amount of capital required to be held in bank. If the amount of capital restricted under the CBLR is substantially greater than the amount required under the existing rules, and the PFI has plans or needs to deploy it, we recommend the PFI consider reporting under the existing regulations.

### **CHANGES FROM THE PROPOSED RULE**

The key changes made to the final rule include:

- Adoption of tier 1 capital versus tangible equity;
- Removal of the qualifying criteria for mortgage servicing assets and deferred tax assets arising from temporary differences;
- Removal of CBLR regulatory capital proxy rules when a community bank's CBLR fell below 9% and it wanted to remain in CBLR framework; and
- Insertion of the two-quarter grace period.

For details on the rule as originally proposed see our white paper from April 10, 2019 - <https://www.wilwinn.com/resource/community-bank-leverage-ratio/>.

## About Wilary Winn

Founded in 2003, our mission is to provide advice to strengthen financial institutions. We provide independent, fee-based advice to more than 500 financial institutions located across the country. We offer the following services:

### **CECL & ALM**

We provide holistic solutions to measure, monitor and mitigate interest rate, liquidity, and credit risk on an integrated basis.

#### **OUR CECL & ALM SERVICES INCLUDE:**

##### *Credit Risk:*

Current Expected Credit Loss (CECL)  
Capital Stress Testing  
Concentration Risk Management  
Real Return Analyses

##### *Outsourced ALM Advisory:*

Interest Rate Risk Management  
Budgeting and Balance Sheet Optimization  
Liquidity Stress Testing

### **MERGERS & ACQUISITIONS**

We provide independent, fee-based determinations of fair value for mergers and acquisitions.

#### **OUR MERGER & ACQUISITION SERVICES INCLUDE:**

Preliminary and Final Merger Valuation  
Accretion True-up

Goodwill Impairment Testing  
ASC 310-30

### **VALUATION OF LOAN SERVICING**

We provide comprehensive and cost-effective valuations of servicing arising from the sale of residential mortgage, SBA 7(a), auto, home equity and commercial loans.

#### **OUR LOAN SERVICING OFFERINGS INCLUDE:**

Residential MSRs  
SBA 7(a) Loan Servicing  
Commercial Servicing

### **ADDITIONAL SERVICES**

We provide services to support our CECL, ALM, Fair Value and Loan Servicing product offerings.

#### **OUR ADDITIONAL SERVICES INCLUDE:**

Fair Value Footnote  
ALM Model Validation  
Non-Maturity Sensitivity Analyses  
Mortgage Banking Derivatives (IRLCs)

SBA 7(a) Gain on Sale  
Troubled Debt Restructurings (TDRs)  
Non-Agency MBS  
TruPS
